

# PORTABLE HANDLIGHTS: RECHARGEABLE

PRODUCT  
CODE

C

This series of heavy duty portable handlights was designed for police, fire, and emergency services. Batteries are housed in piano hinged 1/8" thick ABS Cases. Handles are molded closed making them almost impossible to break. Heads are clevis mounted which allows light to be directed up and down. All units can be recharged from vehicle (12VDC) or desk (120VAC) chargers. They are available with shoulder straps and a variety of sealed beam lamps. Standard units operate for 1 1/4 hours per charge with an intensity of 160,000 CP lamp. All lights can either be rack charged or desk charged.

- (A) **MODEL: A38-ESU-H7635-S-ST** - As shown with a single head, 160,000 CP lamp and a shoulder strap. Uses either desk or wall mounted charger racks.
  - (B) **MODEL: A38-FBII-H7635-S-ST** - This unit has a high power spot and a low power flood. The flood operates 4 1/2 hours on one recharge. By adding the Suffix **-FL**, the above unit has a red removable filter and the bottom head also flashes.
  - (C) **MODEL: A38-H7604-S-ST** - Same as above units but the head is smaller Par 36 Halogen Sealed Beam where space is critical.
  - (D) **MODEL: VCM-12-LED** - This is a heavy duty vehicle charger rack has a magnet for recharging off any 12 volt battery system in a vehicle or boat.
  - (E) **MODEL: ACHG-12-4-AJ** - Desk charger for above lights. Plugs into any 120VAC outlet and will automatically recharge and turn off in 2 hours. Size: 4 3/4" x 5 3/4" x 3 1/4"
- MODEL: ACHG-12-1-AJ** - Same type as above but requires 7 hours to recharge. Unit is housed in smaller case which only measures 2 3/4" x 2" x 5"
