

# TRIPODS & CONES

**A) MODEL: QUADPOD**

**TRIPOD (HEAVY DUTY)** - has four legs which fold down, then out, for maximum stability. Also with legs folded up unit can be stored in a small compartment. With unit fully opened, the mast extends up to the height of 9 feet to meet Uniform Traffic Code. Warning light head fits into top collar and warning signs can be clamped directly to the staff. Fold Down Size: 9" W x 36 3/4" H

**(B) MODEL: MTE TRIPOD** - is a more economical type. It has 3 legs, good for up to 50 MPH winds. Also it has a hook for hanging warning lights for stability. Extends up to 8 1/2'.

**MODEL: MTE-BR** - Same as above but the main staff comes apart for storage.

**(C) MODEL: MBW** - Pipe staff complete with extension slider. Height assembled is 5' 6".

**MODEL: SFSH** - Pipe staff which locks into the base. Has no extension slider.

**MODEL: SFBB** - Cast iron 17 lb. base.

**STAFF AND BASE** - Used in city environments where large pedestrian traffic occurs. There are no legs sticking out and people will not trip over them. Also storage is at minimum space since cast iron bases and staffs unlock and come apart completely. This type uses 18 lb. cast iron bases with 1" steel staffs.

**(D) MODEL: TRCONE-12** - 12" Traffic Cone  
**MODEL: TRCONE-18** - 18" Traffic Cone  
**MODEL: TRCONE-28** - 28" Traffic Cone  
**MODEL: TRCONE-36** - 36" Traffic Cone

**MODEL: REF-4** - 4" Reflectorized collar

**MODEL: REF-6** - 6" Reflectorized collar

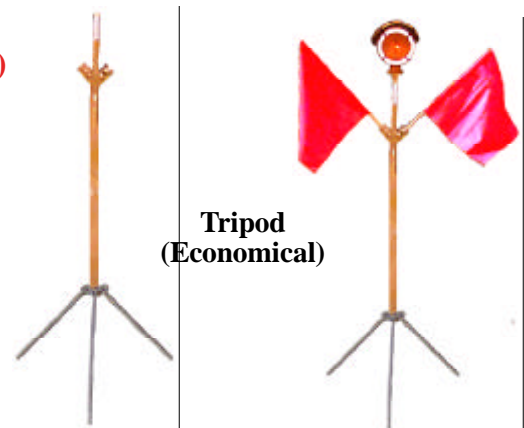

**TRAFFIC CONTROL CONES** - These traffic cones are used as an additional measure of safety to warn drivers and pedestrians of hazardous and construction sites. Constructed of durable PVC material. Reflectorized collars can be added to the cone for better visibility.
