

WARNING LIGHTS & SIGNS: CONSTRUCTION

PRODUCT
CODE

G

A complete line of barricade type lights for protecting work areas on highways. Using either dry cell or rechargeable batteries.

(A) MODEL: RECHARGEABLE-D

RECHARGEABLE D - This is the top of the line of Class B High Intensity Flashers. The battery and charger are housed in 18 GA steel box and is plugged directly into a wall outlet for recharging. Operates 168 hours continuously flashing between charges.

(B) MODEL: D-DRY-PH - As shown with permanent head on. Case size 8 3/4" x 11" x 5 3/4". Weight less battery: 10 lbs.

MODEL: D-DRY-DH - Same as above but head is detachable from case with an 8 foot cord.

DRY TYPE - This unit operates off of Eveready 1862 12 volt plug terminal battery. Operates 168 hours per battery.

(C) MODEL: BARLT-A-FL (Flashing) - Photo electric control turns these lights off automatically during daylight hours.

MODEL: BARLT-C-ST - Same as above but steady amber.

BARRICADE LIGHT - Unit uses two Eveready 509 spring batteries. Has hole in back for mounting and meets requirements for Class A - Flashing Amber Lights.

(D) MODEL: SIGN-MW-30

MODEL: SIGN-MW-30-WB - With carry bag.

MEN WORKING SIGN - Made of vinyl reflective material. Easy to handle roll-up sign. Lightweight and will withstand weathering and rough handling. Supplied with fiberglass ribs and has a steel plated pipe clamp on the back. Also available with a carry bag.
