

BATTERY CHARGERS

(A) **MODEL: SERIES WCHG** - Made for charging 6, 8, 12 volt batteries.

MODEL: SERIES WCHG-NI - This series is for charging various combinations of Nicad batteries on trickle.

WALL CHARGER - A line of high quality dual rate chargers with automatic shut down and short circuit proof protection. The wall type has red light which notifies when batteries are fully charged. Most units can be supplied with custom output plugs. Also available in 120 or 220 VAC input. This unit has a built in thermal switch to protect against overheating.

DESK CHARGER - High quality series of desk chargers. Units are equipped with charge indicator and power on indicators. It is reverse polarity protected and short circuit proof. Desk type are designed for charging batteries greater than 6 amp hours. Made for charging batteries voltage range 4, 6, 8, 12, 18, 24, 30.

(B) **MODEL: SERIES ACHG-12-4** - These are made in 120 or 220 VAC inputs with various types of output plugs. Two case sizes available depending on output. In 12 volt series will charge at 4 amp rate.

Size: 5 1/2" L x 4 3/4" W x 2 1/2" H

(C) **MODEL: SERIES ACHG-12-4** - Same as above (B). Except larger case will charge at 5 amp rate on 12 volts.

Size: 5 1/2" L x 4 1/2" W x 3 3/4" H

(D) **MODEL: ACHG-12-1** - Automatic 1 Amp at 12 Volt charger. Have power and charge LED's with replaceable fuse.

Size: 2" x 2 1/2" x 5 1/2"

Available battery voltages are:
6, 12, 14, 18, 24 and 30 volts
